## Professional Experience

|                                                                                                                                                                                                                                                                        |                                |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>Automation Developer</b> , <i>Multi ManTech Internation Pvt. Ltd.</i> <ul style="list-style-type: none"><li>Developed AI-powered automation solutions using MERN and Python to optimize workflows, improve efficiency, and deliver intelligent insights.</li></ul>  | 03/2026 – 05/2026<br>Ahmedabad |
| <b>Student Intern - Data Science Pro Program</b> , <i>FingerTips Institute</i> <ul style="list-style-type: none"><li>Built ML models using Python and Scikit-learn, performed EDA, data cleaning, feature engineering, and created data insights dashboards.</li></ul> | 06/2025 – 01/2026<br>Ahmedabad |
| <b>Flutter Developer (Freelance Project)</b> , <i>Fiverr.com</i> <ul style="list-style-type: none"><li>Built a complete Shrimad Bhagavad Gita resource (18 chapters) with shlokas, audio, and explanations in 3 months.</li></ul>                                      | 01/2025 – 03/2025              |

## Academic Background

|                                                                                                                                                                                 |                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>B.S.C. (IT) in Computer Science</b> , <i>GLS University, Ahmedabad</i> <br>CGPA: 8.30 / 10 | 06/2022 – 05/2025<br>Ahmedabad |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|

## Technical Skills

|                                                                                                      |                                                                                                           |
|------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------|
| <b>AI Development</b><br>Advanced ML, GenAI, PromptEng, AI Automation.                               | <b>Data Science</b> — Competent<br>Advanced Excel, EDA, Feature Engineering, Machine Learning, Statistics |
| <b>Web &amp; App Development</b><br>AI-Assisted Flutter, Firebase, Material-UI, React JS, JavaScript | <b>Tools</b><br>AI Agentic IDEs, TensorFlow, DBeaver, Git, GitHub, Android Studio, VS Code                |
| <b>Programming Languages</b><br>Python, Dart, Shell Scripting, JavaScript                            | <b>Databases</b><br>FierBase, MySQL, MongoDB                                                              |

## Featured Projects

|                                                                                                                                                                                                                                                                                                                                                                          |                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>TaskFlow AI</b>  <ul style="list-style-type: none"><li>AI-powered project management platform with attendance tracking, PMS integration, task management, and intelligent task/activity summarization.</li></ul>                                                                   | 04/2026 – 05/2026  |
| <b>LeadMatrix</b>  <ul style="list-style-type: none"><li>Built an AI-powered lead discovery platform for automated prospect search, lead management, and scalable business data processing using Next.js, Express.js, TypeScript, and MongoDB. <i>(Ongoing Development)</i></li></ul> |                    |
| <b>Shrimad Bhagavad Geeta</b> <ul style="list-style-type: none"><li>Digital Bhagavad Gita platform with multilingual shlokas, smart search, bookmarking, and AI-powered spiritual guidance chatbot.</li></ul>                                                                                                                                                            | 01//2025 – 07/2025 |

## AI Projects

- **ProposalForge AI** [↗](#) AI-powered platform that automates client proposal generation and workflow management.
- **Cortext Analytics** [↗](#) AI-powered data science platform for analytics, insights, and intelligent decision-making.
- **JarryAI** [↗](#) Full-control AI assistant platform designed for automation and intelligent task execution. (*Ongoing Development*)
- **FluxTube** [↗](#) Built a Python-powered YouTube downloader with smart multi-resolution video fetching.
- **AI Permission Analytics** [↗](#) AI-powered permission analyzer that detects, evaluates, and explains application permissions.

## Data Science Projects

### Case Study

- **Vendor Performance Analysis** [↗](#) - Vendor efficiency, delays, costs, KPIs analyzed..
- **E-Commerce Store Analysis** [↗](#) - Sales, customer behavior, product performance analyzed.
- **Victim & Crime Data Analysis** [↗](#) -Crime types, locations, yearly patterns analyzed.

### Python

- AI Powered ChatBot [↗](#), D-Jango: Class Management Studio [↗](#)

### Machine Learning

- Mastering All ML Model Project [↗](#)

### Flutter Projects

- ERP Based - Factory Management System [↗](#)
- Hanumanji Devotional App [↗](#), Shrimad Bhagvat Geeta [↗](#), MediTrack HelpDesk [↗](#)

## Certifications & Achievements

---

### AI Agent & Full-Stack Developer in Training

- Upskilling in AI Agent development, automation, and full-stack MERN development.

### Finalist at DA-IICT Hackathon | Selected Among Top Innovators for AI-Driven Solution Development.

- Finalist at the DA-IICT Hackathon, contributing to innovative problem-solving and solution development.

### Certified on Data Science Pro Program [↗](#)

- Certified Data Science Professional skilled in Python, SQL, and advanced data analytics.
